

## Michelle Riedlinger

<https://staff.qut.edu.au/staff/michelle.riedlinger>

Michelle Riedlinger (PhD, University of Queensland) is a Senior Lecturer in the School of Communication at the Queensland University of Technology, Brisbane, Australia. She is currently the Secretary of the PCST Network (2017-2021). Michelle has been an active member of the PCST Network since 1996. She is a member of PCST's Social Media and Web Committee and contributes to PCST's Twitter feed, @PCSTNetwork.

Her research interests include online communication of environmental, agricultural and health research, emerging roles for "alternative" science communicators, online advocacy, and public engagement in science. Her research is informed by theories of media, cultural approaches to science, social identity, and pragmatic linguistics. She is a co-investigator on two Social Sciences and Humanities Research Council (SSHRC)-funded projects investigating the online circulation of emerging research findings.

Michelle has worked as a science communication practitioner for over 25 years. As a communication consultant, she has worked on projects focussed on climate variability, dryland salinity, ecology, catchment management, and river health. She has facilitated over two hundred training workshops for researchers in media skills, presentation skills, professional writing, communication planning, and social media management.
